

ONE LINK. THE RIGHT ASSET. STRAIGHT INTO ASSET VISION.

NO APP DOWNLOAD NO ASSET VISION ACCOUNT

A link, the right form and structured information ready for action.

A SIMPLE MOBILE ENTRY POINT INTO ASSET VISION

People outside your asset team often see problems first. Residents notice damage. Site teams complete checks. Operators identify issues.

AV Go turns what they know, or the work they complete, into structured information linked to the right asset, contract and workflow.

HOW AV GO WORKS

1

SCAN OR OPEN

Use a QR code or shared link.

NO APP OR ACCOUNT

A link and a phone are enough

2

FIND THE ASSET

Open one asset, browse a site or choose it on a map.

STRUCTURED FIRST TIME

Your fields, rules and terminology.

3

RECORD OR COMPLETE

Add required details, photos or timesheet information.

CONNECTED TO CONTEXT

The right asset, contract and workflow.

4

READY TO ACTION

Routed to the right workflow in Asset Vision.

EVIDENCE AT SOURCE

Photos and signatures captured on site

TWO WAYS TO USE AV GO ONE CONNECTED WORKFLOW

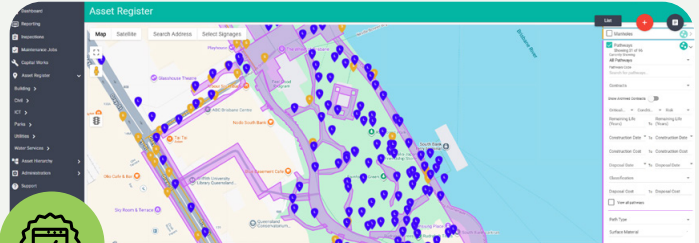

Receive structured information from people outside the core asset team, or let contractors complete work already scheduled in Asset Vision.

REPORT AND RECORD

For requests, defects, inspections, incidents, checks and other structured submissions.

- Report an issue or asset defect
- Complete a site or facility check
- Add photographs at the point of capture

COMPLETE ASSIGNED WORK

For contractors and delivery partners completing work already scheduled in Asset Vision.

- Open the relevant job from a link
- Record progress and completion evidence
- Add configured timesheets or signatures

WHAT AV GO CHANGES

LESS MANUAL HANDLING

Information enters Asset Vision directly instead of being retyped.

MORE COMPLETE RECORDS

Mandatory fields and conditional questions improve consistency.

THE RIGHT CONTEXT

Each submission connects to the asset, place, contract and workflow.

FASTER HANDOVER

Evidence is captured when the issue is seen or the work is completed.

FLEXIBLE CONFIGURATION

Use your fields, terminology, rules and workflow status.

MEASURABLE PARTICIPATION

Track QR entry and completed submissions where configured.

THREE ENTRY PATHS ONE CONNECTED WORKFLOW

For new records, choose the entry path that fits the asset environment. Assigned work opens directly from the job link provided.

GO DIRECT TO THE ASSET

A QR code or link opens the right asset and form immediately.

GO BROWSE THE SITE

Move through your own location and asset structure.

GO CHOOSE ON A MAP

Use an address, coordinates or location for dispersed assets.

COMPLEMENTS ASSET VISION MOBILE

AV Go is browser-based and requires a live internet connection. It is designed for occasional and external participants, not as a replacement for the full offline-capable mobile app used by field teams.
